

DUTY OF CARE

There is a legal requirement for all businesses who produce, keep or dispose of waste of any type to comply with the various regulations and the Duty of Care under Environmental Protection legislation.

Talking Rubbish recognises that it has a responsibility to the environment beyond legal and regulatory requirements, and we are committed to reducing our environmental impact and continually improving our environmental performance as an integral part of our business strategy and operating methods.

Talking Rubbish also recognises the importance of managing its waste responsibly, including reducing the volume of waste sent to landfill and maximising reuse and recycling where possible.

To help achieve our environmental targets, Talking Rubbish applies a 'waste hierarchical' approach: Reduce, Reuse, Recycle and Recover, in preference to the disposal of waste to Landfill.

Talking Rubbish ensures that it:

- Complies with all relevant regulatory requirements
- Continually improves and monitors environmental performance
- Continually improves and reduces environmental impacts
- Incorporates environmental factors into business decisions
- Increases employee awareness and training
